

SOLAR ENERGY PROGRAM

SOLAR ELECTRIC APPLICATION AND AGREEMENT (UNDER 10kW)

INSTRUCTIONS

- Carefully review the Terms and Conditions for participating in the EarthWise Solar Energy Solar Electric program.
- Carefully review the technical requirements and specifications in the **Distribution Interconnection Agreement**. This form will be sent to you for signature after the system passes city inspection.
- Once SRP has received and approved the application package, you will receive an **Application Status Notification**.
- SRP will review the Generating Facility design to ensure it meets our requirements, upon which you will receive a **Design Review Notification**.
- Work with your contractor to have the Generating Facility permitted and inspected as required by local and state codes.
- Upon city inspection approval, please contact the Program Manager at (602) 236-5816 or EarthWiseSolar@srpnet.com to schedule SRP inspection and meter installation.
- After the Generating Facility has passed the inspection and the necessary metering installed, SRP will process the EarthWise Solar Energy incentive.

Complete the form and mail the application package including:

- **Completed application,**
- **Required drawings for design review,**
- **Quote**

Please mail the application package to:

SRP EarthWise Solar Energy Program

Inverter Manufacturer _____ Model No. _____ Qty. _____

Battery Backup: None Other _____

Rating (DC Watt STC): _____

Nameplate Rating:

Voltage _____ kW-AC _____

Power Factor _____ Frequency _____

Single Phase Three Phase

Estimated Installation Date: _____

SRP Incentive Calculation: $\frac{\$3.00}{\text{DC Watt STC (SRP Incentive)}} \times \text{_____ (DC Watt STC)} = \$ \text{_____}$

BUYBACK SERVICE

SRP allows customer-located, interconnected generation devices to qualify for buyback service. For details and rules, please refer to SRP’s applicable buyback service riders. Please indicate below if you wish to sign up for a buyback service rider.

Buyback Service: Yes No

Type of Buyback Service: Residential Solar Buyback Service Rider Commercial Buyback Service Rider

Point of Buyback: At the meter Other (Please provide details with submitted drawings.)

ADDITIONAL REQUIRED INFORMATION

The information below must be submitted for all projects. **Provide three sets of all diagrams, including any revisions or changes as they are made.** Diagrams must also include project name and address, show system size and all protective relaying and control equipment, as well as service entrance and SRP meter.

- A. **Electrical One-line diagram**
- B. **Electrical Three-line diagram:**
Include all neutral and ground conductors and connections.
- C. **Site Plan and Maps:**
Include the street address, arrangement of the major equipment, including the electrical service entrance section and SRP meter, location of generator and interface equipment, and the location of the disconnect switch.
- D. **Point of Contact:**
If the interconnection and start-up process is to be coordinated through a party or individual other than the Owner, provide the name, company, address and phone number of that party with whom SRP is to coordinate the interconnection.

SRP EARTHWISE SOLAR ENERGY PROGRAM TERMS AND CONDITIONS

This SRP EarthWise Solar Energy Solar Electric Agreement (“Agreement”) is entered into by and between Owner and Salt River Project Agricultural Improvement and Power District, an agricultural improvement district organized and existing pursuant to the laws of the State of Arizona (“SRP”), sometimes referred to individually as a “Party” and collectively as the “Parties”. The definitions and information included in the SRP EarthWise Solar Energy Solar Electric Application are also incorporated into this agreement. The Parties agree as follows:

1. Owner is an SRP customer and will install the solar electric system (“Generating Facility”) in SRP service territory. For new construction, the Builder is the Owner until sale of the property.
2. Only SRP customers are eligible.
3. Limit one Generating Facility per meter.
4. Owner must use a licensed contractor. Eligible license classifications include: C-05, C-11, L-05, L-11, K-05, and K-11. To verify a contractor’s license validity, please visit the Arizona Registrar of Contractors at www.azroc.gov. SRP shall not be held liable for any damages or other problems resulting from the Generating Facility or installation to the Generating Facility.
5. Generating Facilities must be permitted and inspected as required by local and state codes.
6. Generating Facilities installed before January 1, 2004 are not eligible.

7. To connect the Generating Facility to SRP's electrical grid, the Owner shall sign SRP's current form of the Distribution Interconnection Agreement ("Interconnection Agreement") and meet all SRP interconnection requirements (as set forth in SRP's Rules and Regulations and Interconnection Guidelines for Distributed Generators).
8. SRP will pay \$3.00/watt (based on the DC Watt STC rating) up to a maximum of \$30,000 (10 kW) per Generating Facility. The incentive will be made after the Owner signs SRP's current form of the Interconnection Agreement and the Generating Facility passes SRP inspection.
9. An annual spending cap is set for EarthWise Solar Energy incentives. After this cap is reached, reservations will be taken for next year's funds.
10. SRP reserves the right to adjust the EarthWise Solar Energy incentive level and spending cap for the next year based on participation. SRP wishes to maximize the number of customers who can participate and might reduce the incentive per Generating Facility if the funds are quickly reserved for the entire year. This decision will be made before accepting reservations for future years' funds.
11. SRP is not responsible for any tax liability imposed on Owner as a result of the incentives under this program.
12. By accepting the EarthWise Solar Energy Solar Electric incentive, Owner hereby sells, transfers and delivers to SRP all Environmental Attributes and Environmental Attribute Reporting Rights, as such terms are defined below, associated with the Generating Facility during the operating life of the Generating Facility. This provision shall survive the termination of this Agreement and any subsequent sale(s) of the Generating Facility. "Environmental Attributes" shall mean any and all fuel, emissions, air quality, or other environmental characteristics, including green energy tags, renewable energy credits, or certificates attributable to the metered output generated by the Generating Facility during the operating life of the Generating Facility and in which Owner has property rights or will have property rights upon such attributes coming into existence. "Environmental Attributes Reporting Rights" shall mean all rights to report ownership of the Environmental Attributes to any person or entity under Section 1605(b) of the Energy Policy Act of 1992, any successor or replacement statutes, or otherwise.
13. EarthWise Solar Energy funds will be reserved after a completed application is received and approved by SRP. Owner has six (6) months to install the Generating Facility from date the funds are reserved. After six (6) months, Owner's reservation of funds expires. If unreserved funds are available, and Owner is still planning to install the Generating Facility, a new reservation will be made at the current rate (see above table).
14. For new home construction with planned installation beyond six (6) months, please estimate installation date. Funds will be reserved based on incentive level at time of installation. Funds will be reserved for up to three (3) months past estimated installation date.
15. Owner agrees to let SRP monitor output of Owner's Generating Facility to verify energy generation.
16. Owner agrees to let SRP use data from Owner's Generating Facility in research activities and to publish the data.
17. Owner shall own and be responsible for the design, installation, construction, operation and maintenance of the Generating Facility in accordance with all manufacturers' requirements, all applicable codes and laws, and the requirements of all governmental agencies having jurisdiction. SRP does not warrant or guarantee the amount of energy, energy savings, or product reliability.
18. This Agreement shall be interpreted, governed by, and construed in accordance with the substantive and procedural laws of the State of Arizona, without regard to conflicts of law principles. SRP and Owner agree that any action, suit, or proceeding arising out of or relating to this Agreement shall be initiated and prosecuted in

state or federal court of competent jurisdiction located in Maricopa County, Arizona, and the Parties irrevocably submit to the jurisdiction and venue of such court. To the fullest extent permitted by law, each Party hereby irrevocably waives any and all rights to a trial by jury and covenants and agrees that it will not request a trial by jury with respect to any legal proceeding arising out of or relating to this Agreement.

This Agreement is dated and effective as of the latest signature date below.
