

SOLAR ENERGY PROGRAM

SOLAR WATER HEATING APPLICATION AND AGREEMENT

INSTRUCTIONS

- Carefully review the Terms and Conditions for participating in the SRP EarthWise Solar Energy Water Heating program.
- Once SRP has received and approved the application package, you will receive an **Application Status Notification**.
- Work with your contractor to have the Solar System permitted and inspected as required by local and state codes.
- Once installation, permitting and inspection are complete, submit copies of the contractor's receipt. The receipt must show the licensed contractor's name, phone number, license number, amount paid, date paid, and date installation was completed.
- Upon receiving the contractor's receipt, the EarthWise Solar Energy incentive will be issued.

Complete the form and mail the application package including:

- **Completed application,**
- **Quote**

Please mail application package to:

4. Solar Systems must be permitted and inspected as required by local and state codes.
5. Only OG-300 certified Solar Systems are eligible for the SRP's EarthWise Solar Energy Program. A list of OG-300 certified Solar Systems is available at the Solar Rating and Certification Corporation's web site at www.solar-rating.org.
6. SRP will pay \$0.50 per installed kWh of estimated energy savings (based on the OG-300 rating).
7. Solar pool heating systems are not eligible for the EarthWise Solar Energy incentive.
8. Solar Systems installed before September 1, 2004 are not eligible.
9. An annual spending cap is set for EarthWise Solar Energy Water Heating incentives. After this cap is reached, reservations will be taken for next year's funds.
10. SRP reserves the right to adjust the incentive level and spending cap at any time based on participation. SRP wishes to maximize the number of customers who can participate and might reduce the incentive per Solar System if the funds are quickly reserved. This decision will be made before accepting reservations for future years' funds.
11. SRP is not responsible for any tax liability imposed on Owner as a result of the incentives under this program.
12. By accepting the EarthWise Solar Energy Water Heating incentive, Owner hereby sells, transfers and delivers to SRP all Environmental Attributes and Environmental Attribute Reporting Rights, as such terms are defined below, associated with the system during the operating life of the system. This provision shall survive the termination of this Agreement and any subsequent sale(s) of the system. "Environmental Attributes" shall mean any and all fuel, emissions, air quality, or other environmental characteristics, including green energy tags, renewable energy credits, or certificates attributable to the metered output generated by the system during the operating life of the system and in which Owner has property rights or will have property rights upon such attributes coming into existence. "Environmental Attributes Reporting Rights" shall mean all rights to report ownership of the Environmental Attributes to any person or entity under Section 1605(b) of the Energy Policy Act of 1992, any successor or replacement statutes, or otherwise.
13. The amount of renewable energy credits allocated will be based on the SRCC OG-300 system ratings for Phoenix, Arizona.
14. EarthWise Solar Energy funds will be reserved after a completed application is received and approved by SRP. Owner has six (6) months to install the system from date the funds are reserved. After six (6) months, Owner's reservation of funds expires. If unreserved funds are available, and Owner is still planning to install the system, a new reservation will be made at the current rate.
15. For new home construction with planned installation beyond six (6) months, please estimate installation date. Funds will be reserved based on incentive level at time of installation. Funds will be reserved for up to three (3) months past estimated installation date.
16. Owner agrees to let SRP use data from Owner's system in research activities and to publish the data.
17. Owner shall own and be responsible for the design, installation, construction, operation and maintenance of the system in accordance with all manufacturers' requirements, all applicable codes and laws, and the requirements of all governmental agencies having jurisdiction. SRP does not warrant or guarantee the amount of energy, energy savings, or product reliability.

18. This Agreement shall be interpreted, governed by, and construed in accordance with the substantive and procedural laws of the State of Arizona, without regard to conflicts of law principles. SRP and Owner agree that any action, suit, or proceeding arising out of or relating to this Agreement shall be initiated and prosecuted in a state or federal court of competent jurisdiction located in Maricopa County, Arizona, and the Parties irrevocably submit to the jurisdiction and venue of such court. To the fullest extent permitted by law, each Party hereby irrevocably waives any and all rights to a trial by jury and covenants and agrees that it will not request a trial by jury with respect to any legal proceeding arising out of or relating to this Agreement.

This Agreement is dated and effective as of the latest signature date below.
